BIOGRAPHY

DJs & PRODUCERS

Joanna and Magda also known as the Tecnotik Twins, are two aspiring DJs/Producers. Magda who is 21 years old, moved to America from Poland when she was only four years old. That is when she met her cousin, Joanna, who is currently 19 years old. Joanna and Magda became best friends and inseparable, as they realized they both shared the same interests. They both were very passionate about the same music. Techno and Trance is the type of music they both grew up listening to. Famous producers like Armin Van Buuren and Tiesto were their inspirations and role models.

During their early high school years, they listened to electronic, dance music. Ever since, they knew they wanted to become a DJ. They decided to take their love for music to a professional level and learn how to produce their own electronic/dance music. Joanna and Magda both decided to attend SAE Institute, an audio engineering school located in NYC. This gave them an opportunity to expand their knowledge in the music industry.

The girls know how to connect with the crowd and shake up the dance floors. Currently, the girls use Serato along with their Pioneer DDJ-SX. The girls use both Reason and Ableton Live to produce and mix.
